

Our Compliance | Council Housing

2026/27 Q1 Update

We carry out regular safety checks to make sure both our homes and communal areas are safe and meet legal requirements. All gas safety checks and carbon monoxide alarms in homes are fully compliant, and communal areas are 100% compliant across gas, electrical, fire, water, asbestos and lift safety. A very small number of homes are currently overdue for electrical or smoke alarm checks, mainly due to access issues, and we are actively working with tenants to complete these as quickly as possible to maintain everyone's safety.
